WAJEEHA ASAD

Computer Science Student | Aspiring AI Engineer

techwithwajeeha@gmail.com +92 316 8679615 Multan, Pakistan

linkedin.com/in/wajeehaasad github.com/wajeeha-asad wajeehaasad-portfolio.vercel.app

PROFESSIONAL SUMMARY

Computer Science student with a 3.80 CGPA and hands-on experience building AI-powered applications, full-stack web products, and machine learning projects. Experienced in Python, React, FastAPI, and integrating generative AI into software solutions using LLMs and retrieval-augmented generation (RAG). Contributed to collaborative hackathon projects involving AI-powered citizen services and medical-report explanation. Currently strengthening AI/ML foundations through structured training and technical assignments as an AI Engineering Intern. Interested in building practical, user-focused AI products.

PROFESSIONAL EXPERIENCE

AI Engineering Intern | Paandaaa 09/2026 – Present | Remote

- Strengthening foundational knowledge in Artificial Intelligence and Machine Learning through mentor-led technical training.
- Completing structured assignments to reinforce core concepts and develop practical problem-solving skills.
- Developing the foundation needed to apply AI/ML techniques to software development and future engineering projects.

EDUCATION

The Women University, Multan 09/2023 – 06/2027 | Multan, Pakistan
Bachelor of Science in Computer Science
CGPA: 3.80/4.00 7th Semester

TECHNICAL SKILLS

Languages — Python, C++, C#, JavaScript, SQL
AI/ML — Machine Learning, scikit-learn, Pandas, NumPy, Data Preprocessing, Feature Engineering, Model Evaluation, Random Forest
Generative AI — LLM Applications, LLM APIs, RAG Fundamentals, Embeddings, AI Agents, Prompt Engineering
Backend — FastAPI, Flask, REST APIs, SQLAlchemy, Pydantic, JWT Authentication, PostgreSQL, Supabase, Alembic
Frontend — React, Vite, JavaScript, HTML, CSS, Tailwind CSS, shadcn/ui, Framer Motion, Chart.js
Tools & Deployment — Git, GitHub, VS Code, Vercel, FastAPI Cloud, Streamlit, Figma

CERTIFICATION & ACHIEVEMENTS

Generative and Agentic AI Application Developer Certificate 10/2026 | Online
Pak Angels | iCodeGuru | ASPIRE Pakistan

- Successfully completed the Generative & Agentic AI Training — Cohort 11 (August–October 2026).
- Received the **Top Performer Award** in recognition of performance during the training program.

GenAI & Agentic AI Grand Hackathon 10/2026 – 10/2026 | Online
Contributed frontend development and UI/UX to BrainX AI, an AI-assisted medical-report explanation project.

GenAI & Agentic AI Hackathon 09/2026 – 09/2026 | Online
Contributed to CivicAgent PK, a citizen-focused generative AI solution developed during a 36-hour hackathon.

BCG GenAI Job Simulation, *Forage* 09/2026 | Online
Forage Practical tasks involving data extraction, analysis, and an AI-powered financial chatbot.

Digital Marketing & E-commerce - Coursera 06/2025 – 07/2025 | Online
Covered SEO, branding and online marketing strategies.

Graphic Design & UI/UX - Adobe 10/2025 – 01/2026 | Multan
Learned Design Fundamentals, layout, typography and UI principles.

PROJECTS

NeuraTrack, *AI-Powered Learning Tracker*
React, TypeScript, FastAPI, Python, SQLAlchemy, PostgreSQL
- Developed a full-stack learning-tracking application designed to help users organize learning paths, manage study sessions, and monitor progress.
- Built frontend and backend components connecting a React-based interface with REST APIs and a PostgreSQL database.
- Worked on features including learning sessions, progress tracking, notifications, and user authentication.

Live: https://neuratrack-app.vercel.app/
GitHub: https://github.com/wajeeha-asad/NeuraTrack

BrainX AI, *AI Brain Tumor Diagnostic Copilot*
Frontend Development, UI/UX, Generative AI
- Designed and developed frontend interfaces for an AI-assisted medical-report explanation platform.
- Worked on user flows for authentication, MRI file submission, and presenting AI-generated explanations of diagnostic predictions.
- Collaborated with a team on a project exploring generative AI and agentic workflows for medical information.

Live: https://BrainXAI.zaheer.tech
GitHub: https://github.com/zaheer-ahmed77/BrainX-AI

CivicAgent PK, *AI-Powered Citizen Complaint Assistant*
Python, Groq API, Llama 3, ChromaDB, RAG
- Contributed to a generative AI solution designed to help citizens submit complaints and understand relevant policies in Urdu and English.
- Worked on LLM integration, prompt engineering, and retrieval-augmented generation using ChromaDB.
- Contributed to a collaborative prototype developed during a 36-hour GenAI hackathon.

GitHub: https://github.com/wajeeha-asad/CivicAgent-PK-wajeeha

Skill Gap Predictor, *Machine Learning Application*
Python, Machine Learning, Streamlit
- Built a machine learning application focused on identifying skill gaps and presenting data-driven insights.

- Developed an interactive interface to make model predictions accessible to users.
